

Using SoftChalk LessonBuilder to create learning objects

Lesson objectives

By the time you complete this tutorial, you will be able to:

- Use Softchalk LessonBuilder software tool to create an .html document.
- Upload zipped SoftChalk files to your LMS.

SoftChalk Lesson Builder

The **SoftChalk LessonBuilder™** is a powerful editor and content creator that allows instructors to easily create highly interactive learning modules.

Click the link below to view samples of lessons created with SoftChalk.

http://softchalk.com/examples/lb_examples.html

SoftChalk LessonBuilder Features include:

- No HTML required!
The SoftChalk LessonBuilder allows an instructor to create and edit content as if working in a word processor.
- Quiz Popper
In-line comprehension checking can be easily added through integration of quick-response questions which are self-correcting.
- Text Popper
Quickly add annotations or notes to specific terms or phrases in a text.
- Activities:
 - Matching
 - Seek a word
 - Flash cards
- Package lessons
Content created with the LessonBuilder can be packaged as a zipped file and imported into a Learning Management System such as Blackboard or WebCT.
